

# Remote Bonus Ticket

In every location where are working Ticket Redemption checked by Elmac's Management Kit, it's possible to fidelize completely the players using a special equipment designed by Elmac: the **Remote Bonus Ticket**.

The device consists of a keyboard, a writer/reader for magnetic cards and a thermal printer.

The RBT are connected, also via Bluetooth, to the Management Computer. The owner of the location can decide to give some Bonus or add virtual tickets, to the customers depending on how much they spends on the different "centres" of which the location is equipped, for instance: bar, bowling, laser-game, billiard, etc.

The Bonus can be credited on the "Fidelity Card" of the Prize Operation or printed directly on a bar coded receipt. Every RBT has its own identified code so the Operator can know perfectly, for each delivered prize, to which "centre" to debts the given points, so everything is very easy.

In this way the customer continue to go to the same location because he can obtain bonus for each expenditure that he makes.
