

TOTEM PRIZES

The Elmac Totem Prizes is another very, very important brick on the “wall” that contains the Galileo System. Infact after the Management Kit, that take under control all the ticket redemption in a location and the Ticket Eater Galileo, that allows to count the tickets and charge the points into a loyalty card, the Totem Prizes helps the player to choose and book its prizes by himself and very quietly.

The Totem Prizes is connected to the Galileo computer and shows all the prizes present on stock (and on the shop-windows of the FEC). The player introduces his loyalty card or paper receipts on Totem Prizes. Depending on the total points that he has, the Totem Prizes shows the last 36 pictures of the prizes that he can obtain with those points. The player chooses by touch screen the desired prizes and the Totem Prizes prints a bar coded receipt with the list of prizes. With the receipt the player goes to the operators and asks for the prizes. If the players has used the loyalty card, the total point of the prizes are deducted from the card, otherwise the Totem Prizes gives a receipt with the change.

With Totem Prizes the players has also the possibility to charge the points of some receipts on loyalty card or to get only one receipt as sum of lot of them.
